

Let's " Successful!

Dear Parents,

We are starting a new activity to encourage the mastery of multiplication facts.

Each week we will give the students a timed assessment. They will have 3 minutes to answer 50 math facts. Upon 100% completion of a level, they will move on to the next one.

Each student will work at their own pace. Please understand this is NOT a graded activity, but is intended to reinforce mastery of the multiplication facts.

Attached you will find a few sample assessment sheets. Feel free to make copies to practice with your child.

A mastery of multiplication is essential. So, let's work together on this. Practice at least 10 minutes a day. Use the sample sheets or orally quiz your child while driving in the car. Have fun and "bee" creative!

Your partners in education,

Ms. Hoirch, Mrs. Horn, and Ms. Terry
